Professional Experience

National Institute of Technology, Karnataka **MAY- JUN 2024**
Machine Learning Intern

- Developed a keystroke-based user identification system using KNN.
- Utilized HTML, CSS, and JavaScript for front-end development.
- Improved identification accuracy through machine learning techniques.

WebFlow Community

Content Creator

2023

- Contributed to Srinivas University website, optimizing content strategies to increase user engagement significantly.
- Managed SEO and keywords using Ubersuggest and Google Ads, effectively boosting organic traffic.
- Developed and executed content strategies aligned with community objectives, resulting in substantial growth in website visitors.

Projects

Food Delivery Mobile Application **JUN - JUL 2024**

Developed a comprehensive food delivery app using Flutter and Firebase, ensuring a seamless user experience.

Key Features:

- User-friendly app interface for managing food items in the cart.
- Integration of UPI payment gateway for adding money to the wallet.
- Efficient management of user accounts, wallet transactions, and food item additions.
- Secure backend functionality with well-designed app interface.
- User-friendly features like dropdown menus and snack bars for feedback.
- Technology Used: Flutter, Firebase, UPI, Dart.

Inventory Management System **NOV - DEC 2023**

Developed an Inventory Management System using Flask, HTML, CSS, and Bootstrap.

Key Features:

- Implemented JWT authentication, password hashing, and database integration for security.
- Enabled CRUD operations for seamless inventory management.
- Designed functionalities for administrators to manage users effectively, including signup/login.
- Created a responsive user interface using Bootstrap for optimal usability across devices.
- Integrated SQLAlchemy for efficient database operations.
- Technology Used: Flask, HTML, CSS, Bootstrap, SQLAlchemy.
